

AI • Robotics • Automation

Intelligent technology.
Real solutions.
An automated future.

MONDI integrates artificial intelligence, robotics and automation to turn ideas into efficient, safe and scalable solutions.

AI

Intelligent solutions that learn, analyze and optimize business processes.

Robotics

Advanced robotics for precision, repeatability and performance.

Automation

We automate processes for maximum efficiency and lower operating costs.

About us

MONDI is a technology and innovation integrator dedicated to developing custom solutions in AI, robotics and automation. We help companies become more productive, more agile and ready for the future.

Our values

- ✓ Constant innovation
- ✓ Performance and excellence
- ✓ Integrity and transparency
- ✓ Long-term partnership
- ✓ Results-driven

Let's build the future together!

AI • Robotics • Automation

Artificial intelligence that understands. Solutions that deliver results.

At MONDI, we turn data into valuable insights and ideas into intelligent solutions. We use AI to optimize processes, anticipate needs and create real value for business.

AI for a smarter future

Learning & adaptation

Machine learning models that continuously learn and adapt in real time.

Advanced analytics

We turn data into clear insights for better, faster decisions.

Prediction & foresight

We anticipate trends and behaviors so you always stay one step ahead.

Intelligent automation

AI that optimizes processes, reduces errors and boosts operational efficiency.

How we put AI to work for your business

- ✓ Process optimization and cost reduction
- ✓ Higher productivity and performance
- ✓ Personalization and intelligent experiences
- ✓ Data-driven decisions, not assumptions
- ✓ Real-time scalability and flexibility
- ✓ Continuous innovation and competitive edge

Let's build
the future together!

Technology that thinks.
Partners who deliver.

AI • Robotics • Automation

Advanced robotics for precision, repeatability and performance.

At MONDI, we develop and integrate robotic solutions that bring speed, accuracy and consistency to industrial processes. From robotic cells to collaborative systems, we deliver technology that optimizes production and raises quality.

Robotic solutions for smart industries

Robotic cells

Complete solutions for welding, assembly, handling and other industrial processes.

Collaborative robotics

Safe, flexible cobots that work alongside people.

Precision & repeatability

Precise motion, tight tolerances and consistent quality in every cycle.

Increased productivity

Shorter cycle times, higher output and optimized operating costs.

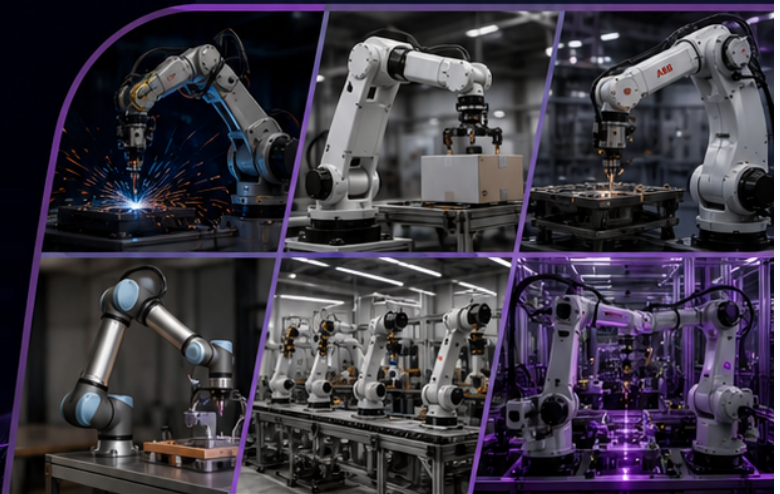

Custom solutions

We design and implement solutions tailored to your needs.

Concrete benefits for your business

- ✓ Higher precision and product quality
- ✓ Shorter production times
- ✓ Improved workplace safety
- ✓ Flexibility and scalability
- ✓ Traceability and full process control
- ✓ Higher output at lower costs

Let's build
the future together!

Technology that produces.
Partners who deliver.

AI • Robotics • Automation

We automate intelligence.
We connect processes.
We control performance.
We deliver efficiency.

Our AI-driven automation and advanced software turn data into action, processes into seamless flows and decisions into measurable results. From full traceability to real-time control, we deliver transparency, precision and scalability.

Intelligent automation
that optimizes every step.
In real time. No compromises.

Intelligent automation solutions

Full traceability

Every product, component and process tracked in real time, from raw material to finished goods.

Real-time control

Automated process monitoring and control for consistent performance and instant response.

AI analytics & reporting

We turn data into valuable insights and clear reports for fast, informed decisions.

Process orchestration

We integrate systems, equipment and apps into one unified, automated and scalable flow.

Quality & compliance

We ensure standards compliance and keep a complete history for audits and certification.

Benefits of intelligent automation

- ✓ Full visibility across operations
- ✓ Fewer errors and manual interventions
- ✓ Higher productivity and efficiency
- ✓ Data-driven decisions, not assumptions
- ✓ Simplified traceability, compliance & audits
- ✓ Faster time-to-market for new products
- ✓ Scalable, flexible and future-ready

Technologies that make the difference

AI & Machine Learning

IoT & Edge Computing

SCADA & MES Integration

Cloud & Data Platform

Cybersecurity

Let's build
the future together!

We automate processes.
We accelerate performance.
We build value.
