

# AI Logistics Control Tower

**See the risks. Prioritize action.  
Take control of operations.**

Turn logistics data into clear insights and AI recommendations, in one control center.

Conceptual visualization • AI Logistics Control Tower

## CENTRALIZED VISIBILITY

Shipments, status and exceptions in one place.

## PRIORITIZED RISKS

Identify situations that need attention and receive AI recommendations.

## FASTER DECISIONS

Less time searching and reporting.  
More time taking action.

**Connect data from TMS • WMS • ERP • APIs**

An intelligence layer for the systems you already use.

**Discover what AI can do for your operations.**

AI LOGISTICS CONTROL TOWER

# More operational control. More value for your business.

MONDI demo interface, adapted from the application screenshot.

## OPERATIONAL BENEFITS

- ✓ Visibility across active shipments in one screen.
- ✓ Faster response to exceptions, with AI recommendations.
- ✓ Less time searching for information across separate systems.

## BUSINESS BENEFITS

- ✓ Support for protecting SLAs and customer relationships.
- ✓ Identify opportunities for operational savings.
- ✓ An extensible foundation for automation and growth.

**Let's build a Control Tower for your operations.**
